NORTHWESTERN SURGICAL ASSOCIATES

At Northwestern Surgical Associates (NSA) we pride ourselves in providing prompt, personalized, and cutting-edge surgical care. Our private surgical practice has been affiliated with Northwestern University's Feinberg School of Medicine for over 50 years and has been recognized for excellence in "Top Doctors" by Castle Connolly and *Chicago* magazine. Patients can expect the benefits of our small group model, including expedited work-up and shared decision-making with a personal touch. In addition, they will benefit from receiving exceptional care at Northwestern Memorial Hospital.

Our clinical expertise includes complex gastrointestinal disorders, gastrointestinal cancer,

abdominal wall hernias, bariatric surgery, colorectal surgery, breast cancer, and gastroesophageal reflux. We utilize minimally invasive approaches such as advanced laparoscopy and robotics. This allows patients to resume normal activity in the shortest time possible, while maintaining superior cosmetic, functional, and oncologic outcomes. Our newest associate, Dr. Daniel Davila, obtained advanced training at Emory University, the first minimally invasive fellowship program in the country, and will help continue our tradition of surgical excellence.

In addition to serving patients, the surgeons of NSA have a commitment to serving their community both locally and abroad. For 12 years, our surgeons have traveled to Guatemala on medical missions in

order to provide state-of-the-art surgery to those less fortunate. Our surgeons are dedicated to the education of future leaders in surgery, and over the last half century have received innumerable awards for excellence in teaching.
